INTERNATIONAL **FND** AWARENESS DAY

#LetsTalkFND

The 13th of April 2018 marks the 6th annual International FND Awareness Day. Patients and their supporters across the globe unite together in the hope of improving the lives of the men, women and children who battle Functional Neurological Disorder (FND). Join me and others from around the world and #LetsTalkFND!

I, _____, hereby pledge to:

- Engage in conversation to turn FND bias, stigma and misunderstanding into support, knowledge and empowerment and share FND education material.
- Share my FND story.
- Contact five people who will pledge a donation to assist in funding activities such as FND education leaflets, FND Scientific Registry for Medical Research, webinars by leading researchers and more.
- Promote awareness through social media platforms.

I will participate to the best of my ability which includes attending to my own health needs first.

Thank you for supporting the #LetsTalkFND pledge and our global initiative to spread FND awareness and end Functional Neurological Disorder suffering.
