

RE: Light up for World FND Month in April

Dear Sir/Madam

I'm requesting your assistance in raising awareness for the most common neurological condition you have never heard of.

Functional Neurological Disorder (FND) is a problem with the nervous system and how the brain and body send and receive signals. FND does not discriminate. It affects men, women and children throughout the world.

Show Your Support:

This April we are striving to be heard and seen, louder and brighter with our message of hope and awareness, for this unknown and under-researched disorder.

Across the globe, people like me are asking everyone to light up the world in orange and/or blue, on **Monday 13 April 2020 or anytime in April 2020** for **World FND Month**. This will highlight the devastating impact of FND on patients.

In return, to show our gratitude and as a thank for supporting FND awareness, we will share your generous support with thousands on our social media platforms, and website,

Share Your Support:

- Hashtag your lit-up photo with #FNDaware and #FND2020 on your social media along with your own Hashtag(s).
- You can also send a lit-up photo to events@fndhope.org, and we will post for you.

I look forward being able to share your support on all our social media platforms.

Kind Regards,

Visit FNDHOPE.ORG for more information

FND Facts

- Life-altering symptoms are comparable to Multiple Sclerosis/Parkinson's disease.
- FND is the second most common reason for a neurology outpatient appointment.
