

Recruiting individuals with a diagnosis of functional seizures (PNES)

We're conducting a study to see if delivering a brief intervention program in different ways has an effect on the number of functional seizures people have

Inclusion criteria

- are you 18 years or older?
- have you been diagnosed with functional seizures (PNES)?
- do you usually have four or more seizures per month?
- eligible for Medicare

What does it involve?

- attending psychiatry or psychology sessions via Telehealth
- completing questionnaires
- undertaking brief neuropsychological testing via Telehealth
